### Incorporation and Nature of Operations

Cartier Resources Inc. (the "Company"), initially incorporated under Part 1 A of the Québec *Companies Act* on July 17, 2006, has been governed by the *Business Corporations Act* (Quebec) since February 14, 2011. The Company's head office is located at 1740, chemin Sullivan, Suite 1000, Val-d'Or, Québec. Its activities primarily include the acquisition and exploration of mining properties in Canada.

The Company has not yet determined whether these properties contain economically recoverable ore reserves. Although, at the current stage of the exploration work, the Company is taking all industry standard measures to ensure that the mining property titles in which it has a financial interest are in good standing, these measures in place do not guarantee property titles to the Company. Property titles may be subject to prior unregistered agreements or non-compliance with regulatory requirements.

The recoverability of amounts reported for mining properties and deferred exploration expenses is dependent on the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development and future profitable production, or the proceeds of the transfer of such property. At the date of the financial statements, the carrying value of mining properties and deferred exploration expenses represents, in management's opinion, the best estimate of their net recoverable value. This value could however be reduced in the future.

On August 18, 2021, the Company's Board of Directors approved these unaudited interim condensed financial statements for the period ended June 30, 2021.

#### 1. Basis of preparation and going concern

These unaudited interim condensed financial statements have been prepared by the Company's management in accordance with ("IFRS"), and in accordance with IAS 34, "Interim Financial Reporting". They do not include all the information required in annual financial statements in accordance with IFRS. These unaudited interim condensed financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2020.

These unaudited interim condensed financial statements were prepared on a going concern basis, using historical costs method except for other short-term financial assets and share-based payments which are recorded at fair value.

The unaudited interim condensed financial statements have been prepared on a going concern basis, meaning that the Company will be able to realized its assets and discharge its commitments and liabilities in the normal course of operations. The Company's ability to continue as a going concern depends on its ability to realize its assets and to obtain additional financing. While it has been successful in raising financing to date, there can be no assurance it will be able to do so in the future. The Company believes it has sufficient liquidity to meet its obligations for the next 12 months. The Company has not yet determined whether its properties contain economically recoverable ore reserves and has not yet generated revenues from operations. The recoverability of the amounts shown for mining properties is dependent upon the existence of economic ore reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties. The above conditions indicate the existence of material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

These unaudited interim condensed financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported amounts of expenses and the classification of statement of financial position items if the going concern assumption was deemed inappropriate, and these adjustments could be material.

## Interim Condensed Notes to the Financial Statements

Three-month and six-month periods ended June 30, 2021 and 2020 (Unaudited)

(In Canadian \$)

### 1. Basis of preparation and going concern (continued)

These unaudited interim condensed financial statements have been prepared using the same accounting methods used in the audited financial statements for the year ended December 31, 2020.

The preparation of unaudited interim condensed financial statements in accordance with IAS 34 requires the use of certain critical judgments and accounting estimates. It also requires management to exercise judgment when applying the Company's accounting policies.

In preparing these unaudited interim condensed financial statements, the important judgments that were made by management in applying the Company's accounting policies and the main sources of estimation uncertainty were the same as those described in the audited financial statements for the year ended December 31, 2020.

### 2. Cash and cash equivalents

As at June 30, 2021 and December 31, 2020, cash and cash equivalents included an account bearing interest and an account without interest, as shown below:

### 6. Mining assets and deferred exploration costs

- (a) On May 12, 2021, an option agreement with Delta Resources Limited ("Delta") was signed, Delta has the option to acquire 100% of the interests of the Dollier property, located 30 km south of the municipality of Chibougamau. During the 4 years option period, Delta will have the exclusive right to acquire 100% interest by issuing the Company a total of 600,000 common shares of Delta and incurring expenses of at least \$1,000,000 on the Dollier property. As at June 30, 2021, no amount has been spent on the Dollier property.

Upon signing of the agreement, the Company received \$10,000 in cash and 100,000 common shares of Delta with a fair value of \$42,000. All the shares issued to the Company, within the framework of the agreement, will be subject to a statutory holding period of 4 months. In the event Delta acquires a 100% interest in the Dollier property, the Company will retain a production royalty of 2% NSR on the Dollier property, of which 1% will be redeemable for an amount of \$2,000,000 and the other 1% will be redeemable, by Delta, for an amount of \$15,000,000.

The property Dollier was written off during the year ended December 31, 2015.

- (b) On April 26, 2021, an option agreement with Hawkmoon Resources Corporation ("Hawkmoon") was signed, Hawkmoon has the option to acquire 100% of the interests of the Wilson property, located 15 km east of the municipality of Lebel-sur-Quévillon. During the 5 years option period, Hawkmoon will have the exclusive right to acquire 100% interest by paying the Company an amount totaling \$1,000,000 in cash, issuing to the Company a total of 5,000,000 common shares of Hawkmoon, incurring expenses of at least \$6,000,000 and completing at least 24,000 m of diamond drilling on the Wilson property. As at June 30, 2021, no amount has been spent on the Wilson property.

Upon signing of the agreement, the Company received an amount of \$200,000 in cash and 700,000 common shares of Hawkmoon with a fair value of \$91,000. All the shares issued to the Company, within the framework of the agreement, will be subject to a statutory holding period of 4 months. In the event Hawkmoon earns a 100% interest in the Wilson property, the Company will retain a production royalty of 2% NSR on the Wilson property, of which 1% will be redeemable for an amount of \$4,000,000.

- (c) On April 13, 2021, the Company acquired from SOQUEM Inc. ("SOQUEM") all the rights and interests of SOQUEM (i.e. 50%) in a group of 14 mining claims located 50 km southwest of Chapais in consideration for a purchase price of \$700,000 payable as follows: (a) an amount of \$300,000 in cash and (b) the issuance of 1,261,431 common shares of the Company with a fair value of \$400,000.

In addition, SOQUEM transferred to the Company all of its rights and interests in a group of contiguous claims, which allows the Company to hold 100% of the Fenton property. The Company granted SOQUEM a 1% net smelter return royalty on the Fenton Property, which can be bought back at any time by the Company for an amount of \$1,000,000. The Company has a right of first refusal with respect to any future disposition to a third party by SOQUEM of the Fenton Royalty, subject to certain exceptions.

In addition, as part of this transaction, the Company has agreed to transfer to SOQUEM all of its rights and interests in a group of 39 claims comprising the Cadillac Extension Property. SOQUEM granted the Company a 1% net smelter return royalty on the Cadillac Extension Property, which may be bought back at any time by SOQUEM for a consideration of \$1,000,000. SOQUEM has a right of first refusal with respect to any future disposition to a third party by the Company of the Cadillac Extension Royalty, subject to certain exceptions. The property Cadillac Extension was written off during the year ended December 31, 2018.

### **9. Share capital (continued)**

(a) During the six-month period ended June 30, 2021, the Company issued 1,000,000 common shares at a price of \$0.125 per share following exercise of options whose fair value of the common shares ranged from \$0.27 to \$0.30 per share. During the year ended December 31, 2020, the Company issued 1,300,000 common shares at a price of \$0.10 per share, 950,000 common shares at a price of \$0.105 per share and 225,000 common share at a price of \$0.14 per share totalling \$261,250 following exercise of options whose fair value of the common shares ranged from \$0.165 to \$0.25 per share.

(b) Issuance of flow-through shares on August 11, 2020

On August 11, 2020, the Company completed a private placement through a broker. The Company issued 21,778,200 flow-through shares at a price of \$0.43 per share for total gross proceeds of \$9,364,626. In connection with the offering, the agent received a cash fee equal to 6% of the gross proceeds of the offering and broker warrants, equal to 6% of the number of shares sold pursuant. Each broker warrant shall entitle the holder there of to acquire one common share at a price of \$0.43 for a period of 12 months following the closing date. The financing is presented net of the value of the broker warrants amounting to \$75,004. Share issue expenses totalling \$667,536 were applied against the share capital.

The Company also renounced the tax deduction related to the flow-through shares, which reduced share capital by \$2,940,057, and the consideration is presented as a liability related to flow-through shares.

### **Share Option Plan**

The Company has a share option plan that has been approved by the shareholders. The maximum number of common shares which may be reserved under the plan is limited to 10% of the number of common shares issued and outstanding (on a non-diluted basis). The options granted cannot exceed 5% of the issued and outstanding common shares. The options vest over a period of 12 months and are exercisable over a maximum of five years.

### 13. Financial Instruments

#### Objectives and policies in managing financial risks

The Company is exposed to various financial risks resulting from its operations and investing activities. The directors and officers of the Company manage those risks.

The Company does not enter into speculative derivative financial instruments.

#### Financial risks

The following paragraphs describe the main financial risks to which the Company is exposed and its risk management policies.

#### Interest risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Cash equivalents bear interest at a fixed rate. In relation to these, the Company is exposed to a limited extent to a change in fair value, because they are redeemable at any time or the Company plans to use them in the short term for its operations. The Company's exposure to cash flow risk related to the interest rate of its loan is limited, since it does not bear interest.

#### Liquidity risks

The Company establishes cash forecasts to ensure it has the necessary funds to fulfill its obligations. Obtaining additional funds makes it possible for the Company to continue its operations, and while it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

#### Liquidity risk analysis

Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has financing sources such as private and public investments for a sufficient amount.

Over the year, the Company has financed its exploration expense commitments, its working capital requirements and acquisitions through private and flow-through financings.

All financial liabilities mature in less than 12 months except for the loan, which matures on December 31, 2022.

#### Sensitivity to credit risk

The Company's exposure to credit risk is limited to the carrying value of its financial assets at the date of presentation of the financial information as disclosed below:

	<b>June 30, 2021</b>	December 31, 2020
	<u>\$</u>	<u>\$</u>
Cash and cash equivalents	<b><u>8,607,970</u></b>	<u>13,271,206</u>

None of the Company's financial assets are secured by collateral or other credit enhancements.

The credit risk for cash and cash equivalents and cash reserved for exploration is considered negligible, since the counterparties are reputable financial institutions with high quality external credit ratings.

### 13. Financial Instruments (continued)

#### Fair value of financial instruments

The Company discloses the fair value hierarchy by which the financial instruments are evaluated and assigned to the following levels. Level 1 features a valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 includes inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 includes inputs for the asset or liability that are not based on observable market data. Marketable securities are classified and evaluated under Level 1.

The carrying amount of cash and cash equivalents, cash reserved for exploration, accounts payables and accrued liabilities approximate fair value based on the close date.

The carrying amount of the non-current liability, which includes the loan, approximates its fair value because market conditions have not changed significantly between the date of the transactions and June 30, 2021.

### 14. Contingencies and commitments

The Company is partially financed through the issuance of flow-through shares. However, there is no guarantee that its expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors. Moreover, tax rules regarding flow-through placements set deadlines for carrying out the exploration work no later than the first of the following dates:

- Two years following the flow-through placements; or
- one year after the Company has renounced the tax deductions relating to the exploration work, exceptionally for 2021, with the federal budget, the Company is entitled to a two-year-delay.

If the Company does not incur eligible exploration expenditures it will be required to indemnify the holders of such shares against all taxes and other expenses incurred as a result of the Company not incurring the required exploration expenses.

During the six-month period ended June 30, 2021, the Company received nil (\$9,364,626 as of December 31, 2020) from flow-through financings. From flow-through financings received in 2020, an amount of \$4,147,070 (nil as of December 31, 2020) was used for deferred exploration costs.

The Company renounced tax deductions related to flow-through financings and a liability related to flow-through shares issued in 2020, totaling \$2,940,057 was recorded at the time of issuance (see note 9). Management was required to incur eligible exploration expenditures before December 31, 2022. As at June 30, 2021, the flow-through share liability was \$1,638,070 (\$2,940,057 as of December 31, 2020).

Total remuneration	289,900	213,327	615,692	419,800

During the six-month periods ended as at June 30, 2021 the key management personnel exercised a total of 1,000,000 share options granted through the share-based payment plans (450,000 in 2020).

### 16. Capital disclosures

The Company's objectives in managing its capital are to ensure sufficient liquidity to pursue its organic growth strategy and undertake selective acquisitions. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares and acquire or sell mining properties to improve its financial performance and flexibility.

The Company's capital is composed of shareholders' equity. The Company's primary uses of capital are to finance exploration expenditures and acquire properties. To effectively manage the Company's capital requirements, the Company has in place a rigorous planning and budgeting process to help determine the funds required to ensure the Company has appropriate liquidity to meet its operating and growth objectives.

The Company expects that its current capital resources and its ability to obtain additional financing will support further exploration and development of its mineral properties for the next 12 months.

The Company is not subject, with regards to external rules, to any requirements regarding its capital, unless the Company completes a flow-through financing for which the cash must be reserved for exploration. As of June 30, 2021, the Company has \$5,217,556 cash reserved for exploration (\$9,364,626 as of December 31, 2020).
